

BANDARI LAVAN SAI

Software Developer

bandarilavansai@gmail.com · +91 8247389530 · Siricilla, Telangana, IN
github.com/Lavansai77 · linkedin.com/in/bandari-lavansai

PROFESSIONAL SUMMARY

Motivated and detail-oriented Software Developer with solid foundations in object-oriented programming, data structures and algorithms, and full-stack web development. Experienced in building end-to-end applications with the MERN stack, designing REST APIs, and working with relational and non-relational databases. Passionate about writing clean, maintainable code and continuously expanding technical expertise across software engineering disciplines.

TECHNICAL SKILLS

Programming Languages: Python, JavaScript (ES6+), SQL

Web Technologies: React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS, Bootstrap, REST APIs

Databases: MongoDB, MySQL

Tools & Platforms: Git, GitHub, Postman, VS Code, LeetCode

CS Fundamentals: Data Structures & Algorithms, OOP

WORK EXPERIENCE

Software Developer Intern — Full Stack (MERN)

Dec 2024 – Jan 2025

EY Global Delivery Services & AICTE | Remote

- Contributed to the full software development lifecycle — requirement gathering, design, implementation, testing — for a production-grade web application.
- Developed reusable React.js components and integrated them with Node.js / Express.js RESTful APIs to deliver end-to-end features.
- Designed and optimised MongoDB schemas and CRUD operations, improving data retrieval efficiency across the application.
- Maintained code quality through Git version control, peer code reviews, and systematic API testing via Postman.
- Applied software engineering best practices, including modular architecture, separation of concerns, and the DRY principle.

PROJECTS

Spotify Clone — Music Streaming Web App

React.js · Redux · Node.js · Spotify Web API

End-to-end web application replicating core Spotify functionality with live API integration, global state management, and a responsive single-page architecture.

- Implemented React Router for seamless SPA navigation across search, playlist, artist, and playback views.
- Designed a Redux store architecture to manage and synchronise global audio playback state across all components.
- Consumed the Spotify Web API to stream live metadata — track listings, album art, and artist profiles — for thousands of songs.
- Applied responsive design patterns (Flexbox, CSS Grid) to ensure cross-device compatibility and pixel-accurate layouts.

Fitness Management System — Full Stack Web App

React.js · Node.js · Express.js · MongoDB

Full-stack software solution for personalised fitness and dietary management, serving users with goal-based plans, automated reminders, and nutritional tracking.

- Designed a RESTful API backend in Node.js/Express.js with structured MongoDB collections for workout categories, meal plans, and user goals.
- Implemented a Calorie Calculator algorithm that computes personalised daily nutritional targets based on user-provided metrics and health goals.
- Built an automated Meal Reminder module with schedule-based triggers and budget-aware diet plan generation.
- Delivered a responsive React.js frontend with component-driven architecture, enabling an interactive, goal-oriented fitness dashboard.

EDUCATION

Vaagdevi College of Engineering, Warangal

Bachelor of Technology in Computer Science & Engineering

2023 – 2026

CGPA: **8.76**

VMR Polytechnic College, Warangal

Diploma in Electronics and Communication Engineering

2020 – 2023

CGPA: **9.38**

CERTIFICATIONS

- **AWS Solutions Architecture Virtual Experience** — *Forage*
- **Building Modern Web Applications with MERN Stack** — *Edu Net Foundation – AICTE & EY GDS*
- **Data Analysis with Python** — *IBM*
- **GenAI Powered Data Analytics Job Simulation** — *Forage*
- **Cybersecurity Essentials** — *CISCO Networking Academy*

HOBBIES

- Playing Cricket
- Dancing
- Meme Creation
- Playing Chess

SOFTSKILLS

- Problem Solving, Critical Thinking, Adaptability, Team Collaboration, Leadership, Quick Learner, Good Communication
