

BANDARI LAVAN SAI

Full Stack Developer | MERN Stack | React.js | Node.js

bandarilavansai@gmail.com · +91 8247389530 · Siricilla, Telangana, IN

github.com/Lavansai77 · linkedin.com/in/bandari-lavansai

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with hands-on experience building scalable, responsive web applications using the MERN stack (MongoDB, Express.js, React.js, Node.js). Proficient in REST API design, state management with Redux, and cloud-ready deployment using Docker. Strong foundation in data structures, algorithms, and modern software development practices. Demonstrated ability to deliver end-to-end features — from UI/UX implementation to backend architecture and database optimisation — with a consistent focus on performance, code quality, and user experience.

TECHNICAL SKILLS

Frontend: React.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, Redux, React Router

Backend: Node.js, Express.js, REST API Design

Databases: MongoDB, MySQL, CRUD Operations, Data Modelling

Languages: Java(Basic), Python, SQL

Tools & DevOps: Git, GitHub, Postman, Docker, VS Code

Concepts: Data Structures & Algorithms, OOP, Responsive Design, API Integration

Soft Skills: Problem-Solving, Team Collaboration, Agile Mindset, Time Management, Leadership

Languages (spoken): English, Telugu, Hindi

WORK EXPERIENCE

Full Stack Developer Intern (MERN Stack)

Dec 2024 – Jan 2025

EY Global Delivery Services & AICTE | Remote

- Designed and developed modern, responsive web applications using React.js for the frontend and Node.js / Express.js for RESTful backend services.
- Implemented and optimised MongoDB CRUD operations, improving data flow efficiency between the client and server layers.
- Collaborated in an agile team environment, applying Git version control workflows and validating API endpoints via Postman.
- Gained practical exposure to full-stack application lifecycle — requirement analysis, component design, integration testing, and deployment preparation.

PROJECTS

Spotify Clone – Music Player Website

React.js · Redux · Spotify Web API · React Router

Built a fully responsive, full-featured music streaming web application inspired by Spotify, delivering a seamless single-page experience across devices.

- Engineered SPA navigation with React Router, eliminating page reloads for search, playlist, and artist views.
- Implemented Redux global state management to synchronise real-time audio playback state across all app components.
- Integrated Spotify Web API to dynamically fetch and render live track metadata, album artwork, and playlists for thousands of songs.
- Applied CSS Flexbox/Grid and responsive breakpoints to achieve a pixel-perfect, cross-device UI layout.

Fitness Management System

React.js · Node.js · Express.js · MongoDB

Developed a comprehensive full-stack fitness and diet management platform tailored to users' personalised goals and financial budgets.

- Architected a RESTful Node.js/Express.js backend serving goal-based workout plans (Weight Gain, Fat Loss, Muscle Building) with structured data from MongoDB.
- Built a dynamic Calorie Calculator module that computes and recommends personalised daily nutritional intake based on user metrics.

- Designed an automated Meal Reminder system and a budget-based diet plan engine with pre/post-workout meal recommendations.
- Delivered end-to-end frontend with React.js and component-level state management for an interactive, goal-oriented user experience.

EDUCATION

Vaagdevi College of Engineering, Warangal	2023 – 2026
<i>Bachelor of Technology in Computer Science & Engineering</i>	CGPA: 8.66
VMR Polytechnic College, Warangal	2020 – 2023
<i>Diploma in Electronics and Communication Engineering</i>	CGPA: 9.38

CERTIFICATIONS

- **AWS Solutions Architecture Virtual Experience** — *Forage*
- **Building Modern Web Applications with MERN Stack** — *Edu Net Foundation – AICTE & EY GDS*
- **Data Analysis with Python** — *IBM*
- **GenAI Powered Data Analytics Job Simulation** — *Forage*
- **Cybersecurity Essentials** — *CISCO Networking Academy*
